PROJECTS UNDERTAKE

Multi-Vendor System

- The Wordpress WooCommerce Multi-Vendor Plugin explicitly developed to switch your WooCommerce website into multivendor platform that having multiple sellers with a separate profile. It gives sellers the functionality of adding the products and order management from the seller panel.

Point of Sales(POS)

- Point of Sale System which provides store owners to have the functionality, where they can easily manage their online stores along with the physical outlets. The physical stores will have a POS front-end management system for which the admin can assign a store agent who can easily manage the sales and customers at that particular store.

Prescription

- Prescription helps customers to buy medicines from an online pharmacy shop by uploading a prescription for the medicines. File attachments are useful for uploading a doctor's prescription for buying medicines, vaccines, or other types of drug products online.
